CLOUDMD365 REMOTE PATIENT MONITORING

CloudMD365 enables continuous patient monitoring breaking the episodic care paradigm so you are in constant communication with your chronic patients. Reduce readmissions, improve your patient's health outcomes, and increase your bottom line. All devices are always **at no cost to Medicare patients** and come ready to use out of the box -- no smartphone, apps, bluetooth, or WiFi required.

HOW IT WORKS

1
Prescribe RPM Devices
Doctors and nurses recommend devices that capture, store, and transmit physiological data. CloudMD365 provides all hardware, connectivity, and patient support*.

2
Review Patient Data (Monthly and Alerts)
Clinicians (Doctors, Nurses, or Medical Assistants) review patient data monthly to identify and intervene with high-risk patients. CloudMD365 provides all tools for you to complete this process.

3
Receive Medicare Reimbursement
Medicare pays $700 per patient per year for remote patient monitoring.

THE ECONOMICS FOR SNF/ALF/HHC (ANNUALLY)

How much your practice can earn each year with CloudMD365 RPM	Medicare reimbursement frequency	100 Patients	1,000 Patients	2,000 Patients
CPT 99453 RPM setup and patient education	**$18.77 -** Once per patient	**$1,877**	**$18,770**	**$37,540**
CPT 99454 co-pay Review, interpretation, and basic communication of RPM data insights for the first 20 minutes	**$64.44 -** Monthly per patient	**$77,328**	**$773,280**	**$1,546,560**
CPT 99457 Review, interpretation, and basic communication of RPM data insights for the first 20 minutes	**$32.84 -** Monthly per patient	**$39,408**	**$394,080**	**$788,160**
CPT 99458 Reported in conjunction with 99457 to report each additional 20 minutes of time	**$32.84 -** Monthly per patient	**$39,408**	**$394,080**	**$788,160**
Practitioner yearly net revenue potential		**$158,021**	**$1,580,210**	**$3,160,420**

THE CLOUDMD365 PLATFORM

CloudMD365 is a modular EHR (Electronic Health Records), meaning our features like RPM, CCM, TeleHealth, Population & Case Management, EMAR, and Behavioral Health are all independent allowing you to add a single module like RPM to your existing EHR, or replace your EHR with CloudMD365's robust platform.
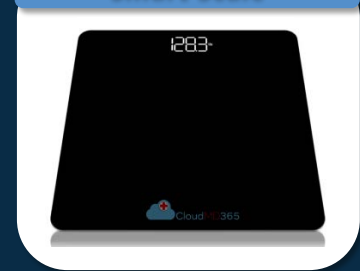

SMART DEVICES

Blood Glucose Meter

- **4G -** (No bluetooth required)
- **Out-of-the-box ready**
- **Test reminders**
- **Notifications with BG results**

Smart Watch

- **4G -** (No bluetooth required)
- **S.O.S.**
- **Blood pressure**
- **Heart Rate**
- **Sleep Habits**
- **Geolocation**

Smart Scale

- **4G -** (No bluetooth required)
- **Out-of-the-box ready**
- **Low profile design**
- **Automatically turns on and off after each use**

SMART PLATFORM

- **Turn-key setup**
- **Access your patient data anytime**
- **Physiological data empowers improved patient outcomes**

BUILT-IN TELEHEALTH

- **Nothing to install**
- **Works on any mobile device**
- **Sessions can be recorded and embedded in the platform.**
